

CERTIFIED SCRUM PRODUCT OWNER

Training Overview

VersionOne users will have a chance to interact with a Certified Scrum Trainer and VersionOne product expert to learn best practices with regard to their Scrum implementation. The class will participate in various exercises designed to zoom in on pain points and help bring resolution to the group with regard to the role and responsibilities of the product owner. The team will be invited to participate in multiple exercises where they will be allowed to encounter real-world scenarios that Scrum teams encounter and leave with the knowledge of how to handle each situation.

Each participant will leave with a manual to serve as a reference document which can be used to reinforce best practices when it comes to implementing Scrum and a one year membership to the Scrum Alliance. Upon successful completion of the Certification Examination offered by the Scrum Alliance, each participant will be recognized as a Certified Scrum Product Owner. By the end of the training participants will have the knowledge they need to embark on any Scrum Engagement in the role of Product Owner.
