

VERSIONONE FOR TESTERS

Training Overview

Essential skills & techniques to successfully use VersionOne's test management functionality

Ideal Audience: Developers, Testers, QA and anyone managing tests in VersionOne

Duration: Four Hours

Join VersionOne for a four-hour immersive VersionOne for Testers course. You will learn how to define regression test plans, generate regression tests, and execute regression test suites across multiple environments and sprints.

All of our classes are led by VersionOne product experts who have years of agile experience. Using testing best practices VersionOne experts will provide hands-on demonstrations of VersionOne's test management functionality that will prepare you for "defect free" releases.

You will leave class with a step-by-step VersionOne reference guide including in-depth instructions for launching and using VersionOne test management capabilities. You will also leave with one month of free access to your on-line demo project to help ensure success using VersionOne.
