**VERSIONONE®**
Agile Made Easier

Implementing the Scaled Agile Framework® (SAFe)® with VersionOne

SAFe® describes four levels of scale: Portfolio, Value Stream, Program, and Team. VersionOne enables you to successfully implement SAFe at each of these levels by providing a centralized environment that simplifies agile adoption and implementation, ensures alignment from the portfolio to the teams, and accelerates software delivery.

Designed to meet the needs of all stakeholders within an organization, VersionOne provides portfolio and program managers with the visibility they need for planning, tracking, and reporting, while providing an easy-to-use, lightweight experience for development teams.

HIGHLIGHTS

✓ Capture and communicate portfolio vision in a single platform

✓ Create multiple Agile Release Trains aligned to portfolio value streams

✓ Use WSJF to rank portfolio items, and manage lean workflow in Kanban boards at each level

✓ Identify and resolve cross-team dependencies with the Program Board

✓ Track progress and adjust plans with edicated SAFe Rooms

✓ Build dynamic program roadmaps that establishes alignment to the business

✓ Use SAFe aligned business intelligence to help make the right decisions

PORTFOLIO

The portfolio is the strategic layer where programs are aligned to the company's business strategy and investment approach. VersionOne simplifies portfolio management, supporting the key constructs defined by SAFe to scale agile at this level.

VALUE STREAM

The Value Stream is an optional level used for large, complex systems which require the features delivered by multiple programs to be aggregated into capabilities. VersionOne fully supports this 4-level model of SAFe for the delivery of complex solutions.
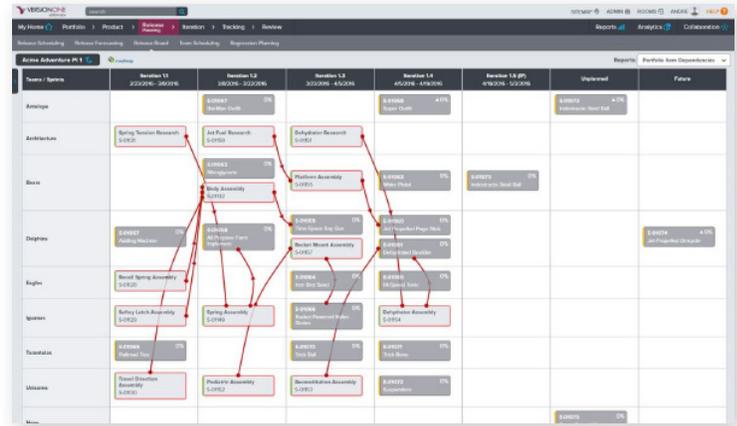

PROGRAM

VersionOne's program management capabilities support unlimited numbers of features and multiple team configurations to help you coordinate your Agile Release Trains (ARTs), plan and execute your program increments successfully, and integrate all software assets across all teams in a program.

TEAM

Agile teams are the foundation of SAFe. VersionOne's dedicated team-based planning and tracking environment allows agile teams to focus on getting their jobs done.
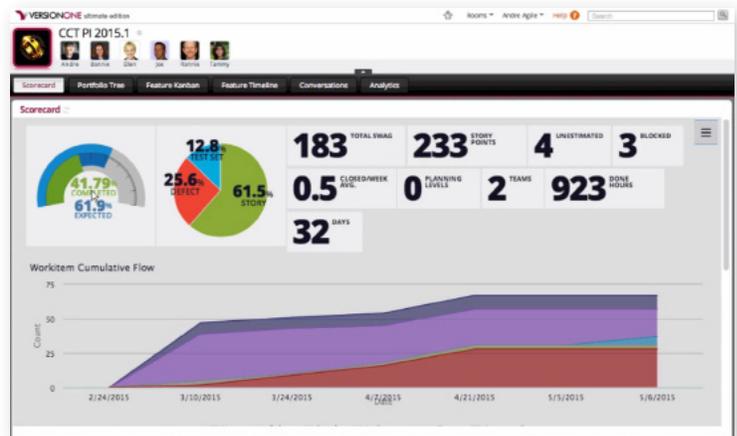

PROGRAM BOARD

Visualize and resolve cross-team dependencies during Program increment (PI) planning. Use the Program Board to coordinate PI dependencies and identify risks to feature development.

EXECUTIVE VISIBILITY

Get instant access to a barometer of your KPIs at each organizational level with performance scorecards, portfolio metrics, and ART metrics.
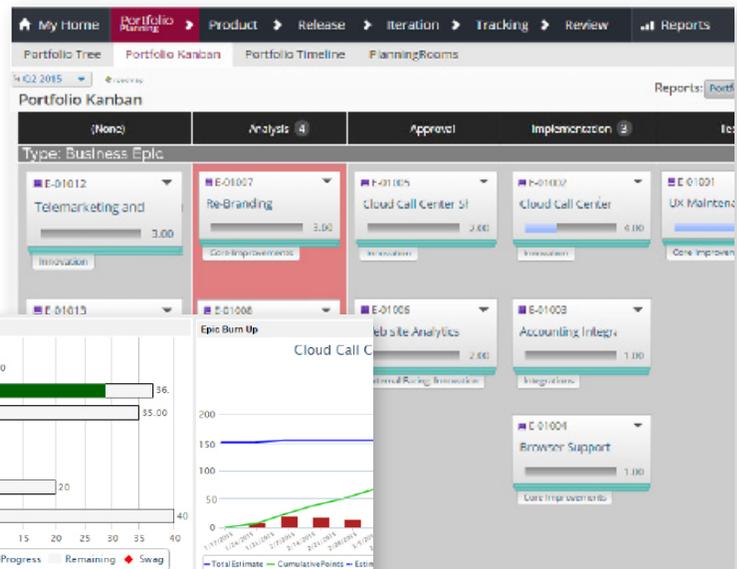

STRATEGIC THEMES

Connect portfolio vision to program execution and provide business context to product owners and product managers to help prioritize, coordinate, and guide the work within an enterprise.

DEDICATED TEAM AND PLANNING ROOMS

Visualize performance at all levels of your organization with dedicated PlanningRooms™ and TeamRooms™ that help focus and streamline work.

RAMP UP ON SAFE FASTER WITH DEDICATED CONSULTING

VersionOne is a Scaled Agile Gold Partner. Our SAFe certified consultants can provide SAFe training for your organization and help you launch your agile release trains. Our consultants will also assist in other activities, such as helping to conduct the Inspect and Adapt workshops or working with the teams to conduct their team-level agile assessments, all while helping to ensure that you are optimizing your use of VersionOne as an enabler of SAFe.
