

Enterprise Agile Success

Predictable 

GOAL Leverage your agile capability to scale and expand across the enterprise for dependable results

Agile team and program capability is not the end goal. Organizations adopt agile practices and platforms to improve business results. This requires leveraging agile to achieve more consistent and dependable results. With dependable delivery, better decisions are made to maximize the ROI on development and IT investments.

Are you ready?

- Are your teams overloaded and losing focus on key initiatives?
- Do you have competing methodologies slowing projects down?
- Is the lack of collaboration between groups and departments causing delays?
- Do you need to rapidly develop the agile skills of your entire organization?

Benefits of Predictability

- Align initiatives to team capacity
- Balance investment decisions across competing initiatives
- Streamlined program-level visibility
- Accelerated delivery with fewer defects
- Reduced release cycle time

Education Activities

Learn agile and lean practices, along with how to practice with the VersionOne platform, to overcome cross-functional challenges, increase visibility at all levels, and increase the speed of your teams.

Making It Happen

VersionOne Implementation Framework

At every phase of your agile journey, VersionOne will guide your teams with a proven methodology to ensure progress to plan.

Enterprise Agile Success

Through our decade of leading organizations to understand and achieve agility, VersionOne has defined five levels of capability for organizations as they adopt agile approaches. Understanding current capability and business goals allows a transition strategy to be developed that is focused and efficient.

- 

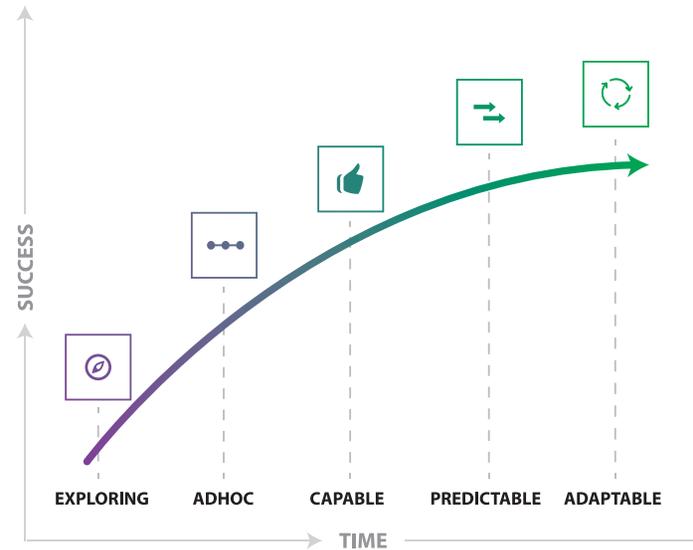

Experimenting with agile in pockets
No initiative to achieve enterprise agility
- 

Considering an agile initiative
Limited to a small portion of the organization
Most processes are status quo
- 

Agile practices and techniques being used
Use of agile still maturing
Performance variance improving
- 

Practices refined and impediments removed
Performance results in accurate Release Planning
- 

Predictability has enabled business decisions to adapt to current market condition

Power and productivity
